Maharashtra Electricity Regulatory Commission

Ref. No. MERC/FAC/2024-25/ 0663

Date: 30 October 2024

To,
The Chief Executive Officer,
Adani Electricity Mumbai Limited,
Devidas Lane, Off SVP Road,
Near Devidas Telephone Exchange
Borivali (W), Mumbai – 400 092

Subject: Prior approval of Fuel Adjustment Charges (FAC) submissions of AEML-D for the month of July 2024.

Reference: 1. AEML-D FAC submission for the month of July 2024 vide email dated 24 September 2024.
2. The data gaps were communicated vide emails dated 04 October 2024.
3. AEML-D replied vide emails dated 10 October 2024.

Sir,

Upon vetting the FAC calculations for the month of July 2024 as mentioned in the above reference, the Commission has accorded approval for charging FAC amount of **Rs. 159.33 Crore**. The opening recoverable FAC available at the beginning of July 2024 is **Rs. 47.57 Crore** and hence the total FAC amount chargeable for the month of July 2024 works out to **Rs. 206.90 Crore**.

AEML-D has submitted the FAC proposal for July 2024 on 24 September 2024 instead of filing it in the month of August 2024 as per the prescribed regulatory timelines. This delay in FAC submission has led to delay in allowing the FAC recovery on a regular basis.

In its FAC submission for July 2024, AEML-D has requested the Commission to allow cumulative recovery of FAC for the period June 2024 and July 2024 in the months of November 2024 and December 2024 at FAC ceiling rate (20% of category energy charge) to ensure that accumulated revenue gap can be mopped up to the maximum possible and avoiding the impact of carrying cost on the accumulated amount. The remaining FAC of around Rs. 60 Crore will be carried forward for recovery in the future. In this regard, AEML-D has also submitted that the Commission vide letter dated 24th August 2024, has approved the FAC for the period up to May 2024 and has approved the category wise FAC for recovery for the months from September 2024 to October 2024 at the ceiling rate (20% of category energy charges) and considered the balance FAC amount of Rs. 47.96 Crore to be recovered in the month of November 2024. AEML-D has suggested that the amount allowed to be recovered in November 2024 (Rs. 47.96 Crore) should be clubbed with the FAC accumulated for the period June 2024 to July 2024 and allowed for recovery in the months of November 2024 and December 2024 at the ceiling rate (20% of category energy charges). Accordingly, as the billing

Approval of FAC Charges for the month of July 2024

for the month of November 2024 has not commenced, AEML-D has requested the Commission to revise the FAC allowed for recovery in November 2024 to 20% of category energy charge and allow recovery of the total accumulated FAC for the months of June 2024 and July 2024 including the recovery allowed earlier in November 2024 (Rs. 47.96 Crore) over the period of November 2024 and December 2024. The portion of the accumulated FAC not recovered over the period November 2024 and December 2024 is proposed to be carried forward for recovery in future period.

Similar situation was prevailing earlier as well, and this situation could have been envisaged well in advance by AEML-D and they could have ensured time submission of FAC proposals and response to data gaps raised by the Commission presently and in the past as well.

As highlighted by the Commission in the past FAC approval reports, variation in FAC amounts over different months leads to variation in Tariff for end consumers on a monthly basis thereby defeating the objective of creating FAC stabilization fund. In similar situations in the past, the Commission has taken an approach to accumulate the FAC leviable and allowing the recovery of such accumulated amounts in ensuing months. Similar approach was also adopted by the Commission for the period January 2024 to May 2024 wherein the recovery was allowed over the period September 2024 to October 2024 at the ceiling rate (20% of category energy charge) and the balance amount allowed to be recovered in November 2024. Accordingly, considering the accumulated FAC over the period June 2024 and July 2024, the Commission deems it appropriate to adopt a similar approach of accumulating the FAC for June 2024 and July 2024 and allowing recovery at the ceiling limit of the FAC charge (20% of category energy charge) which would ensure that the accumulated FAC gets passed through via the FAC mechanism to the maximum extent possible in the remaining period and thus avoiding the impact of carrying cost on the accumulated FAC and the revenue gap to be carried forward to the new Multi Year Tariff control period will be minimal, thus minimising the carrying cost impact on the consumers to that extent. Accordingly, the Commission considers it appropriate to accumulate the FAC for the period of June 2024 and July 2024 and allow its recovery in the ensuing months at ceiling tariff. The recovery will start from November 2024. Accordingly, the total FAC amount chargeable to consumers is as shown in the table below:

Month	FAC Amount (Rs. Crore)
July 2024	206.90

In its approval of FAC for May 2024, the Commission had accorded the recovery of the accumulated FAC between January 2024 and May 2024 in the months of September 2024 to November 2024. Based on the category-wise FAC rate approved by the Commission, the monthly recovery amount was estimated to be Rs. 116.40 Crore for September 2024, and October 2024. The balance recovery allowed in November 2024 was Rs. 47.96 Crore. AEML-D, while submitting its FAC submission of July 2024 requested a consideration of the recovery timeline for the FAC accrued for the period June 2024 to July 2024 from November 2024 onwards. In this regard, as stated earlier, AEML-D has suggested that FAC amount of Rs. 47.96 crore to be recovered in the month of November 2024 should be clubbed with the FAC

accumulated for the period June 2024 and July 2024 and allowed for recovery in the months of November 2024 and December 2024 considering the recovery at the ceiling rate (20% of category energy charge). Further, as the billing for the month of November 2024 has not commenced, AEML-D has requested the Commission to revise the FAC allowed for recovery in November 2024 to 20% of category energy charge and allow recovery of the total accumulated FAC for the period June 2024 to July 2024 including the recovery allowed earlier in November 2024 (Rs. 47.96 Crore) over the period of November 2024 and December 2024. The portion of the accumulated FAC not recovered over the period November 2024 and December 2024 is proposed to be recovered along with the FAC for the future period.

The Commission has considered the submission of AEML-D and has assessed that an estimated amount of Rs. 100.01 Crore can be recovered per month considering the sales for July 2024 at the ceiling FAC rate (20% of category energy charge). The Commission in its FAC approval for May 2024 has allowed an estimated recovery of Rs. 47.96 Crore in the billing month of November 2024. Thus, considering the recovery at ceiling FAC rate, an additional estimated recovery of Rs. 52.05 Crore for the billing month of November 2024 is assessed. Accordingly, the Commission approves an additional recovery of Rs. 52.05 Crores in addition to the previously approved Rs. 47.96 Crore for November 2024, making the total estimated FAC amount recoverable in November 2024 of Rs. 100.01 Crores at the ceiling rate. Accordingly, recovery allowed in the month of November 2024 has been revised and the ceiling rate for FAC will apply in the month of November 2024 as well.

Accordingly, the Commission allows AEML-D to recover the accumulated FAC amount of Rs. 206.90 Crore for the period June 2024 and July 2024 over the months of November 2024 to December 2024 along with the applicable carrying cost. The FAC will be recoverable at the ceiling FAC rate for the months of November 2024 and December 2024 and the balance unrecovered amount will be recovered in the month of January 2025 at the FAC rate approved by the Commission in this report and no carry forward FAC amount is envisaged for recovery in the future period. This is in line with the approach adopted by the Commission in its FAC approval for December 2023 and May 2024. The issue related to disallowance of carrying cost for the period of delay in FAC submissions by AEML-D has been discussed in detail by the Commission in its Order on FAC for the month of April 2023. Same reasons are also valid in the present situation as well.

In view of the above, the Commission deems it appropriate to not allow AEML-D to recover the carrying cost on the FAC over the period of delay. Considering the accumulation of the FAC over a period of 2 months, under normal circumstances, the accumulated FAC for the period June 2024 to July 2024 would have been recoverable from September 2024 onwards. Accordingly, considering that the delay is attributable to AEML-D, the Commission deems it appropriate to disallow the carrying cost for the period of delay from September 2024 to October 2024. AEML-D is also directed to streamline the process of timely submission of the FAC filings for the period beyond July 2024 and submit the pending filings at the earliest. **Failure of AEML-D to adhere to the timeline established by the Commission may force the Commission to take appropriate action for the delays including but not limited to**

disallowance of the interest on working capital during the period of delay, forfeiture of the carrying cost, etc.

Further, as directed in the Order in Case No. 231 of 2022, in order to maintain transparency in the management and use of such FAC Fund, AEML-D shall maintain a monthly account of such FAC fund and upload it on its website for information of stakeholders.

AEML-D is directed to file their future FAC submissions taking into consideration data gaps raised in previous months to ensure timely prior approval.

AEML-D is also directed to submit a copy of the monthly bill after levy of the FAC as approved by the Commission.

Yours faithfully,

Praveen
(Dr. Prafulla Varhade)
Director (Technical), MERC

Encl: Annexure A: Detailed Vetting Report for the month of July 2024.

ANNEXURE

Detailed Vetting Report

Date: ___ October, 2024

PRIOR APPROVAL FOR FAC CHARGES FOR THE MONTH OF July 2024

Subject: Prior approval of Fuel Adjustment Charges (FAC) submissions of AEML-D for the month July 2024.

Reference:

1. AEML-D FAC submission for the month of July 2024 vide email dated 24 September 2024
2. The data gaps were communicated vide emails dated 04 October 2024
3. AEML-D replied vide emails dated 10 October 2024

1. FAC submission by AEML-D:

- 1.1 AEML-D has made FAC submissions for the month of July 2024 as referred above. Upon vetting the FAC calculations, taking cognizance of all the submissions furnished by AEML-D, the Commission has accorded prior approval to AEML-D for the **FAC amount of Rs. 159.33 Crore.**
- 1.2 The opening FAC at the beginning of July 2024 is **Rs. 47.57 Crore** and considering the FAC for the month of July 2024 of **Rs. 159.33 Crore**, the total FAC recoverable at the end of July 2024 is **Rs. 206.90 Crore.**
- 1.3 With the objective of reducing the Tariff variations and also considering the delayed FAC submissions on part of AEML-D for the period of June 2024 to July 2024, the Commission, in line with the approach adopted in the past, is allowing the accumulation of the FAC amount for the period of June 2024 to July 2024 and such accumulated FAC is being allowed to be recovered in the months of November 2024 to January 2025. The FAC will be leviable at the ceiling tariff (20% of category energy charge) for the months of November 2024 and December 2024 and the balance recovery will be done in the month of January 2025 at the FAC rate approved by the Commission in this approval. The FAC rate for November 2024 approved earlier in the FAC Vetting Report for May 2024 is revised in the present report and the FAC recovery at the ceiling rate is approved for November 2024. The recovery details are elaborated in the Section 11 of this report.
- 1.4 Further, considering delay in submission of FAC by AEML-D, the Commission has disallowed the carrying cost for the period of delay. The positive FAC for June 2024 to July 2024 was expected to be levied from September 2024 onwards. However, on account of the delay, the recovery can now start only from November 2024 onwards. Hence, the carrying cost for delayed period (September 2024 and October 2024) is disallowed and shall not be allowed to be passed through to AEML-D consumers.

- 1.5 Further, as discussed in para 11.3 to para 11.11 of this report, the recovery of FAC for the period June 2024 to July 2024 will start from November 2024 onwards and will continue over the period December 2024 and January 2025.

2. Background

- 2.1 On 31 March, 2023 the Commission has issued the Mid Term Review Order in respect of AEML-D (Case No. 231 of 2022) for approval of Truing-up of FY 2019-20 to FY 2021-22, Provisional Truing-up for FY 2022-23 and Revised Aggregate Revenue Requirement for FY 2023-24 and FY 2024-25. Revised Tariff has been made applicable from 1 April, 2023.
- 2.2 Vide its letter dated 20 April, 2020, the Commission communicated the excel formats for filing of FAC submissions to all Distribution Licensees including SEZs. The Commission also directed all Distribution Licensees to submit FAC computations, including details pertaining to variation in fuel cost of generators for the approval of the Commission. On 19 May, 2021, the Commission has also issued guidelines for considering consumer sales in FAC computation from April, 2021 onwards based on uniform methodology.
- 2.3 As per Prior Approval of FAC Guidelines dated 20 April, 2020, the Commission directed Distribution Licensee to seek prior approval for monthly FAC computations. Accordingly, vide its email dated 24 September 2024, AEML-D has filed FAC submissions for the month of July 2024 for prior approval of the Commission. The Commission has scrutinized the submissions provided by AEML-D and has also verified the power purchase bills, and other fuel related invoices provided along with its submissions.

3. Energy Sales of the Licensee

- 3.1 The net energy sales within license area as submitted by AEML-D in the FAC submission and as approved by the Commission are as shown in Table 1 below:

Table 1: Energy Sales – Approved and Actual (MU)

Consumer Category	Approved by the Commission	Monthly Approved	Actual Sales (July 2024)
	(I)	(II=I/12)	(III)
LT Category			
BPL	0.01	0.00	0.00

EHT Category			
EHT Industry	-	-	0.31
EHT Metro & Monorail	120.00	10.00	6.70
Total	11,819.43	984.95	882.48

**In Case of AEML-D, the sales are approved on annual basis. Monthly approved sales are derived based on approved annual sales for comparison purposes.*

3.2 It can be observed from above Table 1 that **actual sales during July 2024 is 882.48 MUs which is 10.40% lower than approved energy sales of 984.95 MU per month for the FY 2024-25.** The sale considered is after netting off the GCN credit for Open Access consumption. AEML-D has considered the energy sales for FAC purposes for July 2024 as follows:

- Energy sales data for HT consumers (AMR) & LT consumers (load above 20 kW) where meters are read remotely or where monthly reading are downloaded is considered for nth month (i.e., for July 2024).
- For cycle consumers (LT cycle billing), consumption data provided is for bill generation (bill posting date) from 1st July to 31st July. These energy sales will pertain to the period which will comprise on an average half of June 2024 and half of July 2024.

3.3 The monthly and cumulative sales for major consumer categories are shown below in the Table 2 below:

Table 2: Monthly and Cumulative Sales for major Consumer Categories (MU)

Year\ Sales (MU)	Residential	Commercial	Industrial	Others	Total (FY 2024-25)	Total (FY 2023-24)
Monthly Approved	417.04	337.67	140.95	89.29	984.95	915.46
Actual - April, 2023	430.58	282.27	96.19	46.35	855.39	842.85
Actual - May, 2023	523.28	316.79	109.14	56.08	1,005.30	910.00
Actual - June, 2024	560.66	312.44	108.42	52.02	1,033.54	962.51
Actual - July 2024	466.94	289.75	71.34	54.45	882.48	834.36

Approval of FAC Charges for the month of July 2024

Year\ Sales (MU)	Residential	Commercial	Industrial	Others	Total (FY 2024-25)	Total (FY 2023-24)
Approved - Cumulative till March 2024	1,668.16	1,350.67	563.82	357.16	3,939.81	3,661.84

4. Power Purchase Details

4.1 The Commission in its MTR Order dated 31 March, 2023 in Case No. 231 of 2022 had approved the Power Purchase by AEML-D for FY 2024-25 from the following list of sources to meet its demand:

- a) Purchase from Adani Dahanu Thermal Power Station (ADTPS)
 - b) Renewable energy procurement (RPS) including Solar and Non-solar
 - c) Bilateral Contracts, Banking of power, and Imbalance pool
 - d) Medium-Term Power Purchase and Short-Term Power Purchase
- Apart from above, there are incidental purchases from Open Access and Rooftop.

4.2 Summary of power purchase of AEML-D is as shown in Table 3 below:

Table 3: Summary of Power Purchase for July 2024

Sr. No.	Particular	Compliance								
1	Purchase from Approved Sources	Yes. AEML-D has procured power from ADTPS, AEL-MTPP, Solar and Non-solar Sources and Bilateral sources in the month of July 2024, which are approved sources of power purchase.								
2	Merit Order Dispatch	Yes. AEML-D had scheduled power as per MoD. With regards to the interstate contracts, as mentioned in the preceding month's FAC approvals, all Interstate contracts viz. RE Hybrid (700 MW), DSPPL (40 MW), AEL-MTPP (500 MW) and other short-term transactions are being scheduled under GNA/ T-GNA, from October 2023.								
3	Fuel Utilization Plan	There is only one thermal generating station of AEML-G, and it has sourced raw / washed coal during the month based upon the availability. Hence there is no scope for improvement in optimal fuel utilization.								
4	DSM Pool	AEML-D has injected 9.76 MUs into the DSM pool as per DSM mechanism.								
5	Sale of Surplus Power	AEML has made sale of 35.15 MUs of surplus power during the month of July 2024.								
6	Power Purchase	Actual Power Purchase is 861.73 MUs as against approved 1,124.64 MUs.								
7	Source wise Power Purchase	<table border="1"> <thead> <tr> <th>Source Name</th> <th>Approved (MU)*</th> <th>Actual (MU)</th> <th>Proportion of each Source in</th> </tr> </thead> <tbody> <tr> <td colspan="4" style="text-align: center;"></td> </tr> </tbody> </table>	Source Name	Approved (MU)*	Actual (MU)	Proportion of each Source in				
Source Name	Approved (MU)*	Actual (MU)	Proportion of each Source in							

Approval of FAC Charges for the month of July 2024

Sr. No.	Particular	Compliance			
				Actual Purchase	
		ADTPS	306.57	243.61	28.37%
		RE Sources	419.15 &	423.38	49.31%
		AEL-MTPP #	197.00	337.85	39.35%
		Bilateral and Banking @	304.46 &	(98.21)	-11.44%
		Bilateral Sale	(102.54)	(35.15)	-4.09%
		Imbalance Pool & Other	-	(9.75)	-1.49%
		Total	1,124.64	861.73	100.00%
		<p><i>*The power purchase quantum/cost approved in MTR Order on yearly basis, however monthly approved numbers are derived from comparison purpose.</i></p> <p><i># The Commission has, vide order dated 29-08-2022 in Case No. 149 of 2022 on the petition filed by AEML-D, approved purchase of 500 MW medium term power for the period 1-9-2022 to 14-10-2024. The power flow has accordingly commenced.</i></p> <p><i>@ Includes power banked under the banking arrangement with MPL (source- BYPL and PSPCL), APPCPL (source- PSPCL), ASL and MPL (source: PSPCL). Accordingly, net energy booked under the banking arrangement in July 2024 is (230.46) MUs. The cost related to the Banking return has not been considered separately, since the banking return is provided from the power available from the existing portfolio of AEML and its cost is therefore already included in the power purchase cost for the month of July 2024. In case of power received from the banking partner, the cost will be considered when the power is being returned.</i></p> <p><i>& Commission in its MTR Order in Case No. 231 of 2022 has approved power procurement of 2,879.88 MUs from RE + Thermal RTC source. This procurement was approved by the Commission vide its Order in Case no 32 of 2022. AEML-D in the MTR Order has submitted that at least 51% of the power will be from RE and balance from conventional sources. Therefore, 51% of the projected quantum is considered for meeting the RPO obligation, out of which 50% each is projected towards Solar and Non-Solar obligation. Accordingly, 51% of the monthly approved quantum is considered under RE sources and 49% under bilateral source.</i></p>			
8	Power Purchase under Section 62 of Electricity Act, 2003	<p>AEML-D is purchasing power from only one source i.e., ADTPS under Section 62 of EA, 2003.</p> <p>As part of verification of fixed cost claimed by AEML-D, the same has been verified from the AEML-D MTR Order in Case No. 231 of 2022. As part of verification of energy charges claimed by AEML-D, operational parameters, fuel cost, GCV, etc is verified from the AEML-G MTR Order Case No. 229 of 2022.</p>			
9	RE Purchase	<p>Monthly power purchase invoices are submitted by AEML-D. Power Purchase rates are verified from the PPA signed by AEML-D with contracted sources of power. For short-term RE power sourced from exchange and short-term power purchase RE contracts, monthly power purchase quantum and rate are verified from the invoices, and it is ensured that same has been considered in the FAC calculation.</p>			

Sr. No.	Particular	Compliance
10	Short Term Power Purchase	Short-term power purchase invoices (from exchange and other sources) of July 2024 are submitted by AEML-D. All the power purchase quantum and rate are verified from the invoices, and it is ensured that same has been considered in the FAC calculation.

4.3 AEML-D has purchased 861.73 MUs of power as against approved 1,124.64 MUs from the sources approved by the Commission.

5. Power Purchase Cost

5.1 The Commission has scrutinised the detailed bills/invoices submitted for power purchase during the month of July 2024, in order to verify the claim of AEML-D regarding Average Power Purchase Cost (APPC). The Commission has verified the actual as well as approved Net Purchase (MUs), Variable Cost (Rs./kWh) and Power Purchase Cost considered in FAC computation from the invoices and applicable MTR Order respectively.

5.2 As submitted by AEML-D, the **Power Purchase cost incurred in July 2024 is Rs. 534.45 Crore** which is higher than the **approved average Power Purchase cost of Rs. 489.58 Crore** by the Commission for the month of July 2024. The cost is higher on account of higher cost of power purchase from sources like ADTPS, AEL MTPP and bilateral purchases. The approved and actual Quantum of power purchase (MU), Power Purchase Cost (Rs. Crore) and Average Power Purchase Cost (Rs./kWh) for the month of July 2024 is shown in Table 4 below:

Table 4: Approved and Actual APPC and Power Purchase Quantum & Cost

Particulars	Source	Power Purchase Quantum (MU)	Fixed Cost (Rs. Crore)	Fixed Cost (Rs./ kWh)	Variable Cost (Rs. Crore)	Variable Cost (Rs./ kWh)	Total Cost (Rs. Crore)	APPC (Rs./ kWh)

*In the case of AEML-D, there is no monthly approval for purchases. The monthly approved power purchase is computed based on the annual approved power purchase for comparison purpose.

Includes power banked under the banking arrangement with MPL (source- BYPL and PSPCL), APPCPL (source- PSPCL), ASL and MPL (source: PSPCL). Accordingly, net energy booked under the banking arrangement in July 2024 is (230.46) MUs. The cost related to the Banking return has not been considered separately, since the banking return is provided from the power available from the existing portfolio of AEML and its cost is therefore already included in the power purchase cost for the month of July 2024. In case of power received from the banking partner, the cost will be considered when the power is being returned.

@ The monthly approved numbers are based on considering the requirement for the period April 2024 to 14th October 2024 (as per the Commission's Order in Case No. 149 of 2022) only and hence the fixed cost appears to be significantly lower than actual.

5.3 The Figure 1 below shows the variation in Approved & Actual Power Purchased Quantum and Approved & Actual APPC for all the power purchase sources of AEML-D:

Figure 1: Approved & Actual Power Purchase and APPC for July 2024

- 5.4 AEML-D has submitted that Merit Order Despatch has been followed. As discussed in the FAC approval for previous months, all Interstate contracts viz. RE Hybrid (700 MW), DSPPL (40 MW), AEL-MTPP (500 MW) and other short-term transactions are being scheduled under GNA/ T-GNA, from October 2023. The Commission has noted the submission.

ADTSP

- 5.5 AEML-D has a PPA with ADTSP (own generation). The Commission in Case No. 231 of 2022 has approved monthly energy quantum of 306.57 MUs from ADTSP at the rate of Rs. 4.94/kWh. AEML-D has purchased 243.61 MUs for the month of July 2024 at an average rate of Rs. 5.30/kWh.
- 5.6 **Fixed Cost:** The Fixed cost approved for FY 2024-25 in Case No. 229 of 2022 (AEML-G) is Rs. 376.33 Crore. The same has also been considered in the AEML-D Order in Case No. 231 of 2022.
- 5.7 **The actual PLF of ADTSP in July 2024 was 72.52% as compared to approved PLF of 76.81%.** ADTSP was available for generation during the month, the average Plant Availability Factor for the month (PAFM) for both Units of AEML-G was 92.96%. The actual Plant Availability Factor for the month (PAFM) for both units of AEML-G in June 2024 was 92.94% during peak hours and 92.97% during off peak hours. The cumulative availability for July 2024 works out to 90.92% during peak hours and 90.47% for off-peak hours respectively. The actual PLF for both units of AEML-G in July 2024 was 69.92% during peak hours and 73.04% during off peak hours. AEML-G has calculated the capacity charges for peak hours of the month and for off peak hours of the month payable for July 2024 as per Regulation 50.2 of the MYT Regulations, 2019. The capacity charges for peak hours works out to Rs. 6.27 Crore and the capacity charges for off-peak hours works out to Rs. 25.09 Crore, totalling Rs. 31.36 Crore.

- 5.8 **Due to lower generation as compared to approved generation, there is an increase of Rs. 0.26/kWh in the Fixed cost and accordingly the actual Fixed Cost per unit is Rs. 1.29/kWh as compared to the approved Fixed Cost of Rs. 1.02/kWh.**
- 5.9 **Energy Charges:** AEML-G has considered the normative operational parameters such as PLF, Availability, Auxiliary Energy Consumption (without FGD), Additional Auxiliary Energy Consumption for FGD, Station Heat Rate and Secondary fuel Oil Consumption as approved by the Commission in Case No. 229 of 2022 for the month of July 2024.
- 5.10 AEML-D has submitted documents to verify the quantity of coal purchased and total cost including breakup of all the cost such as washing charges, Coal handling charges, transportation charges and liaising charges incurred for Domestic Coal and Imported Coal, as applicable, for the month of July 2024.
- 5.11 **Washed Coal:** AEML-D has submitted that AEML-G has received 8,124.60 MT of washed coal at the plant boundary of ADTPS at a rate of Rs. 4709.65 per MT and has consumed 8,985.89 MT of washed coal in July 2024.
- 5.12 "Other Charges" from the closing stock of the last month i.e., June 2024 amounting to Rs. 0.60 Crores have also been considered in the opening stock of the month of July 2024.
- 5.13 In the month of July 2024, Rs. 37,250/-, Rs. 15,425/- and Rs. 91,843 /- have been included as an adjustment under freight charges for washed coal and coal loading charges respectively, on account of diesel escalation June 2024. Further, in July 2024, the washery penalty of Rs. (36,24,950)/- for Q1 of FY 24-25 has been booked under washing charges. Further, the differential ITC on GST paid through different invoices for the month of June 2024 amounting to Rs. (2859)/- has been considered under respective heads in July 2024.
- 5.14 In June 2024, AEML-G has received refund of railway charges of Rs. (1,31,862)/- for washed coal against railway charges paid for October 2022 and November 2022. The same has been considered in the month of July 2024.
- 5.15 In the month of July 2024, AEML-G has received Debit note of Rs. 1,02,72,821/- and Credit Note of Rs. (1,08,35,085)/- pertaining to washed coal. The net credit amount of Rs. (5,62,265)/- for July 2024 which has been considered as an adjustment under SECL coal purchase cost.
- 5.16 In washed coal, AEML-G has considered additional coal received of 70.95 MT coal in received quantity. As submitted in earlier FAC submissions, sometimes, during transit of coal from railway siding in Chhattisgarh to ADTPS, few wagons get detached from rakes due to various reasons and do not reach ADTPS. Later, the missing wagons reach ADTPS, or the coal of the missing wagons is transported to ADTPS through another wagon. The coal quantity received at ADTPS is then accounted for. In the instant case,

a wagon ECO 92209 was missing from the washed coal wagons in April 2024 in RR No. 142000491 dated 09.04.2024. The same wagon was received in July 2024 with a weight of 70.95 MT and added in July 2024 as missing wagon received.

- 5.17 The Commission has examined the invoices, and the supporting excel working provided by AEML-D and has found it to be appropriate. The working of the washed coal fuel cost considered for July 2024 is as shown in the Table 5 below:

Table 5: Working of Washed Coal Rate for July 2024

Particular	Quantity (MT)	Cost (Rs. Crore)	Price (Rs./MT)
Inventory			
Opening (as on 1 st July 2024)	945.63	1.11	11,699.66
Addition during month	8,124.60	3.83	4,709.65
Other Charges			
Total	9,070.23	4.93	5,438.40
Consumption			
Actual	8,985.89	4.30	4,781.17
Other Charges		0.33	
Total	8,985.89	4.63	5,149.40

- 5.18 The overall cost approved towards consumption of washed coal is Rs. 4.63 Crore for the month of July 2024.
- 5.19 **With regards to the washed coal, the weighted average landed cost for consumption in the month of July 2024 is Rs. 5,149.40/MT as compared to MTR-approved Rs. 5,324/MT. AEML-D has consumed 8,985.89 MT of washed coal during the month of July 2024.**
- 5.20 AEML-D has considered the 'As billed' GCV of washed coal as 3,714 kCal/kg, while the 'As Received' GCV of same coal as per M/s IGI certificate (third party appointed by AEML-G for GCV measurement at receiving end) is 3,692 kCal/kg for July 2024. In MYT Order in Case No. 298 of 2019, the Commission has directed AEML-G to consider the GCV 'As Received' or 'As Billed', whichever is higher.
- 5.21 AEML-D has been considering the 'As Received' GCV of the opening stock of the washed coal and the 'As Received' GCV of the washed coal received during the month for working out the weighted average 'As Received' GCV of the coal for the month. The same was used to work out the stacking loss during the month. The Commission has also been approving the computation of GCV based on the same methodology. However, the Commission has adopted a different approach in the MTR Order for AEML-G in Case No. 229 of 2022.
- 5.22 The Commission in MTR Order in Case no. 229 of 2022 for AEML-G, has stated the following:

“4.10.17 Accordingly, the Commission has recalculated GCV (As Received Basis) on the coal procured during the month / year and the weighted average GCV so computed is considered for computation of stacking loss against the GCV (As Fired). The impact of opening / closing stock has not been considered while computing GCV (As Received Basis), the cyclical usage of the coal will nullify the impact in the going concern in future month / year.”

- 5.23 Accordingly, in line with the FAC approval for August 2022 onwards, for the month of July 2024 the Commission has considered the higher of ‘As billed’ or ‘As Received’ GCV of the coal received during the month and has not considered the impact of Opening stock for computing the weighted average ‘As Received’ GCV for a particular type of coal. Also, if a particular type of coal is not purchased in the month of reference (July 2024 in the present situation) but is consumed in that month from an older stock, then in such case ‘As Received’ GCV of that coal purchased in the most recent month (June 2024 or earlier, as applicable, in the present case) would be considered. In the present case, the washed coal was purchased in July 2024 and hence the GCV of this coal will be considered. The Commission has adopted this approach while approving the FAC submissions from August 2022 onwards for AEML-D. The Commission would also be following same approach while approving FAC for AEML-D in ensuing months as well.
- 5.24 In the submission done for the month of July 2024, AEML-D has considered the same approach for determining stacking loss as approved by the Commission. Accordingly, AEML-D has undertaken the Energy charge calculation for ADTPS for July 2024 in line with the above approach and submitted the same for approval of the Commission.
- 5.25 Accordingly, the ‘As Billed’ GCV of 3,714 kCal/kg for washed coal has been considered by the Commission for computing the weighted average GCV and further calculating the energy charge for the month of July 2024.
- 5.26 The transit loss claimed by AEML-D for the month of July 2024 is 26.47 MT which is 0.325% of the overall quantum of washed coal dispatched in that month.
- 5.27 The ‘As fired’ GCV of washed coal considered by AEML-D is 3,635 kCal/kg. Considering the difference between the ‘As Received’ GCV and the ‘As Fired’ GCV, the stacking loss for washed coal works out to 79 kCal/kg which is within the limit of 120 kCal/kg.
- 5.28 **Raw Coal:** AEML-D has submitted detailed computation and methodology for booking the coal consumption cost. AEML-D has calculated the total coal consumption cost based on Weighted Average Price Method by adding the purchases during the month in the opening inventory stock. The closing inventory is then obtained by deducting the coal consumed from the total of opening inventory and purchases during the respective month. AEML-D has purchased 1,57,904.42 MT raw Coal from SECL

and has consumed 2,10,942.25 MT of raw coal in July 2024. As per weighment of coal at ADTPS, the raw coal received is 1,56,650.50 MT (at plant boundary) and the weighment of coal dispatched by SECL was 1,57,904.42 MT. The difference is reported as the transit loss which is 1253.92 MT which is 0.79% of the total coal dispatched during the month of July 2024.

- 5.29 In July 2024, a wagon (Wagon No. NW 27728 of RR No. 162005036 dated 20.07.2024) containing 72.25 MT of raw coal was temporarily missing but was subsequently received later in the same month. The same has been accounted in July 2024. As submitted in earlier FAC submissions, sometimes, during the transit of coal from railway siding in Chhattisgarh to ADTPS, a few wagons get detached from rakes due to various reasons and do not reach ADTPS. Later, the missing wagons reach ADTPS, or the coal of the missing wagons is transported to ADTPS through another wagon. The coal quantity received at ADTPS is then accounted for.
- 5.30 AEML-G has paid railway demurrage charges of Rs. 9,43,856/- for the month of June 2024. These charges are on account of detention of Railway's rolling stock after the expiry of free time for 21 no. of rakes containing raw coal. However, the recovery of Rs. 1,96,787 from HEMS contractor is considered on account of railway charges pertaining to delay in coal rakes unloading. The delay, which was caused as result of defects in the wagon tippler system at coal handling plant, falls under the O&M responsibilities of the HEMS contractor and thus the demurrage charges pertaining to this delay are attributable to the contractor. So, AEML-D has considered the net amount of Rs. 7,47,069/- as railway charges paid for raw coal in the month of July 2024.
- 5.31 AEML-G has received refund of railway charges of Rs (96,688)/- for Raw coal against railway charges paid for October 2022 and November 2022. The same has been considered in month of July 2024.
- 5.32 In June 2024, the amount of Rs. 4,54,850 was provisionally booked under IGI expenses, out of a total of Rs. 5,44,954 (in June 2024 FAC submission). However, the actual invoice for June 2024, totalling Rs. 4,30,843/-, was received in July 2024 and was booked under other fuel expenses of July 2024 FAC submission. Hence an adjustment of (Rs. 4,54,850)/- was made under IGI expenses of July 2024 FAC.
- 5.33 The differential ITC on GST paid through various invoices for the month of June 2024 amounting to Rs. (2,23,088)/- has been considered under respective heads in July 2024.
- 5.34 In the month of July 2024, AEML-G received Debit note of Rs. 55,05,304/- and Credit Note of Rs. (25,73,529)/- pertaining to raw coal. The net debit amount of Rs. 29,31,774/- has been included as an adjustment under SECL coal purchases in July 2024.
- 5.35 The working of the raw coal fuel cost considered for July 2024 is as shown in the Table 6 below:

Table 6: Working of Raw Coal Rate for July 2024

Particular	Quantity (MT)	Cost (Rs. Crore)	Price (Rs./MT)
Inventory			
Opening (as on 1 st July 2024)	1,08,424.06	52.13	4,807.88
Addition during month	1,57,904.42	75.86	4,804.49
Total	2,66,328.48	127.99	4,805.87
Consumption			
Actual	2,10,942.25	101.86	4,828.60
Other Charges	-	0.08	-
Total	2,10,942.25	101.94	4,832.59

- 5.36 The overall cost approved towards consumption of raw coal is **Rs. 101.94 Crore** for the month of July 2024.
- 5.37 **With regards to the raw coal, the weighted average landed cost for consumption in the month of July 2024 is Rs. 4,832.59/MT as compared to MTR approved Rs. 4,850/MT.** AEML-D has consumed 2,10,942.25 MT of raw coal during the month of July 2024.
- 5.38 It has been observed that in July 2024, AEML-G has purchased raw coal from SECL only. AEML-D has considered the 'As billed' GCV of raw coal as 3,682 kCal/kg, while the 'As Received GCV' of same coal as per M/s IGI certificate (third party appointed by AEML-G for GCV measurement at receiving end) is 2,936 kCal/kg for July 2024. As per clause 50.6 of MYT Regulations, 2019, actual loss in GCV of coal between 'As Billed by Supplier' and 'As Received at generating station' is allowed subject to maximum loss of 300 kcal/kg. The GCV loss calculated by AEML- D (difference between 'As Billed' GCV and 'As Received' GCV) for raw coal for the month of July 2024 is 746 kCal/kg, which is more than 300 kCal/kg.
- 5.39 Hence, as mentioned above, the GCV loss (746 kCal/kg) for raw coal for the month of July 2024 is more than the limit of 300 kCal/kg and hence 'As Billed' GCV of 3,382 kCal/kg is considered for calculation (i.e., maximum of the 'As Received' GCV or 'As Billed' GCV minus 300 kCal/kg).
- 5.40 In accordance with the methodology mentioned in para 5.38 and para 5.39, the Commission has approved 'As Received' GCV as 3,382 kCal/kg for raw coal. The 'As Fired' GCV of raw coal is 2,819 kCal/kg. The same has been used to work out the stacking loss of 563 kCal/kg for raw coal.
- 5.41 **Imported Coal:** AEML-G has neither purchased nor consumed any imported coal in July 2024. Also, there was nil quantum imported coal reported in opening inventory of the month of July 2024.
- 5.42 **LDO:** AEML-G has not procured any LDO fuel in month of July 2024. However, AEML-D has consumed 36.05 KL of LDO fuel in month of July 2024.

- 5.43 As submitted in June 2024 FAC submissions, AEML-G had purchased 150 KL of LDO in June 2024. The amount of purchase as per purchase orders was Rs. 1,12,01,803/- while the amount of purchase as per invoices was Rs. 1,04,99,063/-. In June 2024, the amount booked was 1,12,01,803/-, hence the differential amount of Rs. (7,02,741)/- has been booked in July 2024. The Commission has noted the submission.
- 5.44 The working of the LDO fuel cost considered for July 2024 is as shown in the Table 7 below:

Table 7 Working of LDO Rate for July 2024

Particular	Quantity (MT)	Cost (Rs. Crore)	Price (Rs./MT)
Inventory			
Opening (as on 1st July 2024)	453.21	3.36	74,138.77
Addition during month	-	(0.07)	-
Total	453.21	3.29	72,588.18
Consumption			
Actual	36.05	0.26	72,588.18
Other Charges			-
Total	36.05	0.26	72,588.18

- 5.45 The overall cost approved towards LDO expense for the month of July 2024 is **Rs. 0.26 Crore**. With regards to the LDO, the weighted average cost for the month of July 2024 is **Rs. 72,588.18/KL**.
- 5.46 As per MYT Regulations, 2019 for calculation of Energy Charge Rate, the Commission has notified the maximum stacking loss allowed in Clause 50.7 as reproduced below:
- “Any variation in Price and Gross Calorific Value of coal/lignite or gas or liquid fuel as billed by supplier less actual stacking loss subject to the maximum stacking loss of 85 kcal/kg or 120 kcal/kg, as the case may be, vis-a-vis approved values shall be adjusted on month to month basis on the basis of average Gross Calorific Value of coal/lignite or gas or liquid fuel in stock received and weighted average landed cost incurred by the Generating Company for procurement of coal/lignite, oil, or gas or liquid fuel, as the case may be for a power Station.”*
- 5.47 In line with MYT Regulations, 2019 and MYT Order in Case No. 298 of 2019, the Commission has considered stacking loss of 120 kcal/kg (minimum of actual weighted average loss considering washed coal, raw coal, and imported coal of 543 kCal/kg or 120 kCal/kg as per Regulation) for calculation of energy charge rate.
- 5.48 Considering the approved rates for washed coal, raw coal, imported coal and LDO, the fuel cost, GCV and normative operational parameters, the **energy charges** work out to **4.014/kWh** which is higher than the approved variable cost of **Rs. 3.916/kWh** as per the MTR Order for AEML-G (Case No. 229 of 2022).

- 5.49 **Incentive:** As per Regulation 46.3 of MYT Regulations, 2019 specifies the target PLF of 85%. Since the PLF for July 2024 was less than 85% (both in peak hours and off-peak hours), AEML-G has not claimed any incentive for July 2024.
- 5.50 Variation in power purchase expenses from ADTPS on account of change in quantum and per unit rate is as shown in Table 8 below:

Table 8: Variation in Power Purchase expenses from ADTPS for July 2024

Source	Approved Quantum (MU)	Approved rate (Rs./kWh)	Actual quantum (MU)	Actual rate (Rs./kWh)	Variation due to quantum (Rs. Crore)	Variation due to rate (Rs. Crore)	Total variation (Rs. Crore)
ADTPS	306.57	4.94	243.61	5.30	(31.09)	8.84	(22.26)

- 5.51 Based on the above, **APPC for ADTPS works out to Rs. 5.30/kWh as against approved Rs. 4.94/kWh. There is an increase of Rs. 0.36/kWh in APPC for the month of July 2024. Fixed cost variation is contributing to increase of Rs. 0.26/kWh and variable cost variation is contributing Rs. 0.10/kWh to the increase.**
- 5.52 **Power from other generator (AEL- MTPP):** AEML-D has submitted that the Commission has, vide order dated 29 August, 2022 in Case No. 149 of 2022 on the petition filed by AEML-D, approved the purchase of 500 MW medium term power for the period 1 September, 2022 to 14th October, 2024. Power flow has commenced and accordingly power purchase of **337.85 MUs** and the associated cost of **Rs. 191.56 Crore** has been considered in the July 2024 month FAC by AEML-D.
- 5.53 **Solar Purchase:** AEML-D has an Energy Purchase Agreement (EPA) with Dhursar Solar Power Private Limited (DSPPL). The Commission has approved power purchase at the rate of Rs. 10.30/kWh from DSPPL. **AEML-D has purchased 4.98 MUs from DSPPL at the same rate of Rs. 10.30/kWh as approved in the MTR Order.** The Commission has verified the bills/invoices submitted and found them to be correct.
- 5.54 **Wind Solar Hybrid:** AEML also has PPA with Adani Hybrid Energy Jaisalmer Four Limited for 700 MW. The Commission has approved renewable power purchase quantum of 285.19 MUs at the rate of Rs. 3.24/kWh from wind solar hybrid for FY 2024-25. The project has fully commissioned with Hybrid capacity of 700 MW. **AEML-D has purchased 272.01 MUs in the month of July 2024 from wind solar hybrid source at the same rate of Rs. 3.24/kWh as approved in the MTR Order.**
- 5.55 **Non-Solar Purchase:** AEML-D also has an EPA with two non-solar sources namely Tembhu Power Private Limited, and Reliance Clean Power Private Limited. The Commission has approved power purchase from these non-solar sources in the MTR Order. The actual APPC and approved APPC from all the sources is as shown in the Table 9 below:

Table 9: Approved and Actual APPC from Non-Solar Sources

Source	Approved (Rs. /MT)	Actual (Rs. /MT)
Tembhu Power Private Limited	4.26	-
Reliance Clean Power Limited (Now referred to as JSW Renewable)	5.81	5.81

- 5.56 The Commission has approved power purchase rate for Reliance Clean Power Private Limited in the MTR Order in Case No. 231 of 2022. AEML-D has procured 15.06 MUs power from Reliance Clean Power Private Limited at the rate (Rs. 5.81/kWh) during July 2024. Further, no power has been procured from Tembhu Power Pvt. Ltd. during July 2024
- 5.57 **RE + Thermal RTC Power:** AEML-D in its MTR Petition in Case No. 231 of 2022 had sought approval for power procurement through RE + Thermal RTC power source. It has stated that the Commission, vide Order dated 1 November 2022 in Case No. 32 of 2022, has granted approval for procurement of 1,000 MW RE + Thermal (500 MW + additional 500 MW under green shoe option) power on long-term RTC basis. AEML-D has estimated the purchase of power from 15 October 2024 for 1,000 MW (RE + Thermal) on RTC basis. Further it also stated that at least 51% of the power has to be from RE and balance from conventional sources. Therefore, 51% of the projected quantum is considered for meeting the RPO obligation, out of which 50% each is projected towards Solar and Non-Solar obligation. The Commission based on its assessment has considered annual power purchase of 2,879.88 MUs from the proposed RE + Thermal source in FY 2024-25 at the rate of Rs. 4.90/kWh, which is the average GDAM rate of IEX over the 6-month period from July 2022 to Dec 2022. The purchase is expected to be from October 2024 onwards. Accordingly, AEML-D has considered 51% of the approved quantum under RE sources and 49% of the approved quantum under bilateral purchase from conventional sources. **In the month of July 2024, no power has been purchased from this source.**
- 5.58 **Short Term Contracts for RE power:** AEML-D in the MTR Petition in Case No. 231 of 2022 had submitted that it is exploring tie up of Short-Term Wind power from generators located in Maharashtra and had estimated quantum of approximately 526 MU at the purchase rate of Rs. 2.90/kWh for FY 2023-24 and FY 2024-25. However, while the Commission, in its Order, approved the quantum as estimated by AEML-D for FY 2023-24 at the rate of Rs. 4.90/kWh, considering the average GDAM rate from July 2022 to December 2022, no procurement was approved for FY 2024-25 considering the energy availability considered by the Commission from other sources.
- 5.59 However, considering the power requirement during the month, AEML-D submitted in the FAC application that it had contracted Intrastate Non-Firm Wind capacity up to 498.9 MW in July 2024 on short term basis. Out of total contracted capacity, part of the power has been contracted through competitive bidding with fixed tariff while the

remaining has been contracted through day-ahead exchange linked contract (linked to DAM/GDAM). Through such as exchange linked contract, the trading margin of IEX is also saved. In support of the same, AEML-D has submitted Letters of Intent (LOIs) issued to the generators. Although, the Commission, in its MTR Order has not approved any procurement of short term RE Power for FY 2024-25 considering the energy availability considered by the Commission from other sources, it is matter of fact that RE + Thermal RTC Power was not available in June 2024 and would be available from October 2024 onwards only. Further, the procurement of short term RE Power has been undertaken by AEML-D through competitive bidding process and through exchange linked contracts. Considering that the rates are discovered through competitive route, the Commission has presently considered the same for approval under this FAC vetting process for July 2024.

- 5.60 AEML-D has stated that the bill/ invoice against the said contract/LOI was not received, as GCN has not been received by the seller from MSEDCL. Thus, since the quantum is not known at this point of time, AEML-D has estimated it in proportion to the generation capacity of sources. A working of this estimation as submitted by AEML-D is provided below:

Table 10: Estimation of STPP RE procured in proportion to capacity

Particulars	Capacity (MW)	Energy (MU)	Remark
Total RE Capacity (Contracted + OA)	759.81	199.45	Prov Actual REMC as per SLDC DSM bill data (A)
OA (LT+MT+ST)	215.91	56.68	Prov. Actual REMC in proportion of Capacity (B = $99.45 \times 215.91 / 759.81$)
Contracted (LT + ST)	543.90	142.77	Prove Actual REMC in proportion of Capacity. (C = $199.45 \times 543.90 / 759.81$)
Contracted RE (LT)	45	15.06	Actual RE Energy as per Bills (D)
Contracted RE (ST) by AEML-D	498.90	127.71	Estimated ST RE Energy (C - D)

- 5.61 Further, in line with the direction of the Commission in the approval of the FAC for December 2023 to consider both units as well as the corresponding costs, AEML-D has estimated the provisional average rate of power purchase for the short term RE power at Rs. 2.97/kWh. Considering the estimated quantum of 127.71 MUs and the provisional average rate of power of Rs. 2.97/kWh, the cost has been estimated to be Rs. 37.94 crore for the month of July 2024. Further, some of the bills pertaining to earlier months (August 2023 to February 2024) were paid in the month of July 2024 amounting to Rs. 0.87 crore and the same are considered as part of power purchase cost in the month of July 2024. Accordingly, the total cost of Rs. 38.81 Crores is considered as part of power purchase cost of STPP RE in the month of July 2024.

- 5.62 Accordingly, the Commission approves the power purchase of short term RE in the month of July 2024. However, AEML-D needs to track the market movements and ensure that the terms of the contract are beneficial for the consumers.
- 5.63 As the approval by the Commission is on yearly energy quantum, the monthly variation in power purchase from various sources of power is being accepted provided cumulative power procured from majority of the sources is within the approved energy quantum.
- 5.64 Variation in power purchase expenses from RE sources on account of change in quantum and per unit rate is as shown in Table 11 below:

Table 11: Variation in Power Purchase expenses from Renewable Energy Sources for July 2024

Source	Approved Quantum (MU)	Approved rate (Rs./ kWh)	Actual quantum (MU)	Actual rate (Rs./ kWh)	Variation due to quantum (Rs. Crore)	Variation due to rate (Rs. Crore)	Total variation (Rs. Crore)
Solar							
DSPPL	4.34	10.30	4.98	10.30	0.67	(0.00)	0.67
Adani Hybrid Energy Jaisalmer Four Limited - Wind Solar Hybrid (AHEJFL)	285.19	3.24	272.01	3.24	(4.27)	(0.00)	(4.27)
Non-Solar							
Tembhu Power Pvt. Ltd.	0.99	4.26	-	-	(0.42)	-	(0.42)
JSW Renewable (Reliance Power Pvt. Ltd.)	6.25	5.81	15.06	5.81	5.12	(0.00)	5.12
RE + Thermal RTC*	122.39	4.90	-	-	(59.97)	-	(59.97)
STPP RE + IEX G-DAM [#]	-	-	131.32	3.04	-	39.91	39.91
Total RE Sources	419.15	3.84	423.38	3.37	(58.88)	39.91	(18.97)

[#] This includes the provisional quantum (127.71 MUs) of power purchased from short term RE (intrastate non-firm) sources for which the invoices are not available. As directed by the Commission, AEML-D has now considered a provisional cost of Rs. 37.94 Crore against this quantum. Further, few bills pertaining to power supply in earlier months were paid in July 2024 amounting to Rs. 0.87 Crore which were paid in July 2024 have been considered.

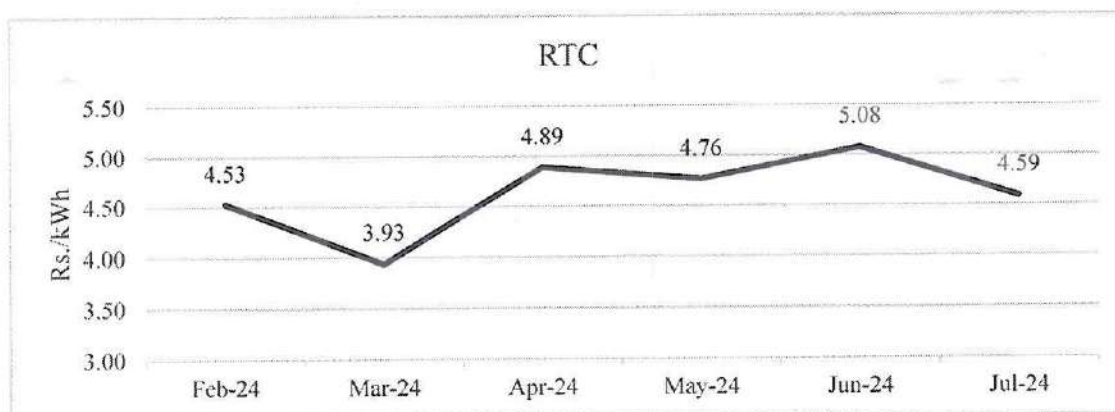

* This is only 51% of the total monthly power procurement approved by the Commission from RE-Thermal RTC source.

- 5.65 **APPC for renewable sources for the month of July 2024 works out to Rs. 3.37/kWh which is lower than MTR approved level of Rs. 3.84/kWh.**
- 5.66 **Bilateral Purchase:** AEML-D has undertaken bilateral purchase of power from power exchange (IEX, PXIL, and HPX), through exchange price linked bilateral contracts and

inter-discom trade (BEST) at the average rate of Rs. 6.17/kWh which is higher than the approved rate of Rs. 5.13/kWh. It is observed that the average power prices in short term market are higher in July 2024 as compared to the prices observed during February 2024, and March 2024. However, the average power prices in short term market are lower in July 2024 as compared to the prices observed during April 2024, May 2024 and June 2024 which is also reflected in the average power purchase in April 2024 (7.79/kWh), May 2024 (8.54/kWh) and June 2024 (7.87/kWh).

Figure 2: Exchange price trends (RTC)

5.67 AEML-D has purchased 132.25 MUs through bilateral purchase (IEX, HPX, PXIL and Inter Discoms Trade) which is 15.35% of its total power purchase for July 2024. The summary of the power procured from the various short-term sources is reproduced in the table below:

Table 12: Summary of power procured from short term sources

Sr. No.	Source	Net Purchase (MU)	Power Purchase Cost (Rs. Crore)	Average Power Purchase Cost (Rs./kWh)
Bilateral Sources				
1	IEX	84.82	42.50	5.01
2	PXIL	31.41	26.23	8.35
3	HPX	14.32	11.01	7.69
4	STPP BEST	1.70	1.64	9.67
5	Exchange sale cost	-	0.08	-
6	MSLDC scheduling & rescheduling charges and MSLDC charges for IEX standing clearance for next month	-	0.09	-
7	HPX Membership Fees	-	0.06	-
	TOTAL	132.25	81.62	6.17

5.68 AEML-D has to pay fees of Rs. 7,500/- per month to MSLDC towards IEX standing clearance in advance, for next month. The said amount is as per the amount approved by the Commission in SLDC Order in Case No. 291 of 2019 (same as that approved by

the Commission in the SLDC's MTR Order in Case No. 233 of 2022) and the same is considered as part of Bilateral purchase cost in FAC for July 2024.

- 5.69 Further, AEML-D received a bill in the month of July 2024 from MSLDC for scheduling and rescheduling charges as per clause no. 6.2.8 of the Hon'ble Commission's Order in Case No. 219 of 2019 dated 30-03-2020 amounting to Rs. 8,74,000 for June 2024. This is proposed to be considered as part of Bilateral power purchase cost, in FAC for July 2024.
- 5.70 In the month of July 2024, AEML-D has paid membership fees to HPX amounting to Rs. 5,90,000 and the same is proposed to be considered as part of Bilateral power purchase cost, in FAC for July 2024.
- 5.71 AEML-D has submitted the bill/invoices regarding the purchase of power from exchange and the Commission has verified the energy quantum and power purchase cost and found it to be appropriate. AEML-D has also submitted the sample LOIs for day ahead exchange linked contract. Accordingly, the Commission approves the aforesaid bilateral purchase with APPC of Rs. 6.17/kWh.
- 5.72 Variation in power purchase expenses from bilateral sources on account of change in quantum and per unit rate is as shown in Table 13 below:

Table 13: Variation in Power Purchase expenses from bilateral sources for July 2024

	Approved Quantum (MU)	Approved rate (Rs./kWh)	Actual quantum (MU)	Actual rate (Rs./kWh)	Variation due to quantum (Rs. Crore)	Variation due to rate (Rs. Crore)	Total variation (Rs. Crore)
Bilateral Purchase	76.32	5.13	132.25	6.17	28.69	13.77	42.47

- 5.73 **Banking Return:** AEML-D has entered a banking arrangement for 200 MW power wherein MPL (source- BYPL and PSPCL) will be banking power with AEML-D from October 2023 to December 2023 and 1st March 2024 to 15th April 2024. The return of banked power at 105% by AEML-D will be from 20th June 2024 to 30th September 2024. Under this contract, for the month of July 2024, AEML-D has returned 160 MUs under this arrangement. The cost related to the Banking return has not been considered separately, since the banking return is provided from the power available from the existing portfolio of AEML and its cost is therefore already included in the power purchase cost for the month of July 2024.
- 5.74 AEML-D has also entered a banking arrangement wherein AEML-D will bank power with APPCPL (source- PSPCL) for the month of November 2023. Under the arrangement, the return of banked power by APPCPL (source- PSPCL) shall be from July 2024 to September 2024 with the return percentage at 105% of banked energy. Under this contract, for the month of July 2024, AEML-D has returned 13.16 MUs under this arrangement. The cost related to the Banking return has not been considered

separately, since the banking return is provided from the power available from the existing portfolio of AEML and its cost is therefore already included in the power purchase cost for the month of July 2024.

- 5.75 AEML had banked 2.80 MU with ASL in the month of February 2024, which shall be returned by ASL from July 2024 to September 2024. Accordingly, in the month of July 2024, AEML has received from ASL the quantum of 4.18 MU.
- 5.76 AEML-D has entered a banking arrangement wherein AEML-D will bank power with APPCL (source: PSPCL) and MPL (source: PSPCL) over the period July 2024 and August 2024. Under this arrangement, for the month of July 2024, AEML-D has been banked 30.74 MU each with APPCL and MPL. The cost related to the Banking return has not been considered separately, since the banking return is provided from the power available from the existing portfolio of AEML and its cost is therefore already included in the power purchase cost for the month of July 2024.
- 5.77 Thus, the net Banking considered is as follows:

Table 14: Details of Banking for July 2024

Particulars	Quantum (MU)
Banking return (MPL- BYPL and PSPCL)	(160.00)
Banking return (APPCPL - PSPCL)	(13.16)
Banking received (ASL)	4.18
Banking return (APPCL and MPL - PSPCL)	(61.48)
Total	(230.46)

- 5.78 Further, for the purpose of banking, open access charges (Rs. 0.31 Crore) have been incurred under the banking contract. The same has been included in the cost of power procurement for July 2024.
- 5.79 **DSM Pool:** AEML-D has submitted that for the month of July 2024, it has injected 9.76 MUs into the pool under the DSM mechanism and has incurred cost of Rs. 0.80 Crore.
- 5.80 AEML-D has submitted that basis the suo moto Order dated 02 August 2022 issued by the Commission in the matter pertaining to 'Commercial implementation of the MERC (Deviation Settlement Mechanism and related matters) Regulations, 2019, post expiry of stabilization period and related issues thereof, MSLDC has issued weekly revised bills for the period from 11-10-2021 to 07-05-2023, except for the week 29-08-2022 to 04-09-2022 (which is pending) and will continue to do so in the near future
- 5.81 Based on the revision in bills, there are instances of amount receivable and amount payable. The incremental amount of Rs. 12.80 crore is paid by AEML-D till the month of July 2024 and the differential amount receivable by AEML is Rs. 12.40 crore. Based on approach of the Commission in the May 2022 month FAC approval, AEML-D

considered Rs. 0.40 crore (Rs. 12.80 crore minus Rs. 12.40 crore) as Pool previous period adjustment in the month of July 2024 FAC.

5.82 Power Procurement from Open Access and Roof Top Solar Consumers: As per MERC (Distribution Open Access) (First Amendment) Regulations, 2019:

“20.5. The unutilised banked energy at the end of the month, limited to 10% of the actual total generation by such Renewable Energy generator in such month, shall be considered as deemed purchase by the Distribution Licensee at a rate equivalent to that stipulated under yearly Generic RE Tariff Order applicable for respective technology...

...Provided further that provision relating to Banking of the Principal Regulations shall continue to apply for existing Open Access Agreements or contracts as on date of notification of the first amendment of the Principal Regulations, till the expiry of the approved period for such OA transactions, beyond which provision relating to Banking under Regulation 20 of the first amendment of the Principal Regulations shall apply.”

Further, as per MERC (Net Metering for Roof-top Solar Photo Voltaic Systems) Regulations, 2015:

“10.3. The unadjusted net credited Units of electricity as at the end of each financial year shall be purchased by the Distribution Licensee at its Average Cost of Power Purchase as approved by the Commission for that year, within the first month of the following year:”

5.83 The surplus energy of Roof-Top Solar and RE Open Access consumers (Firm and Non-firm) purchased by AEML-D as per the aforementioned regulations is 0.1 MUs at a cost of Rs. 0.0022 Crore and is considered in the FAC for the month of July 2024. AEML-D has submitted the details of the power procured as a part of the submission which has been verified based on consumer wise detail provided by AEML-D.

5.84 Sale of Power: AEML has sold 35.15 MUs under bilateral transaction and received Rs. 18.26 Crores for the month of July 2024. AEML-D has sold the additional power at the average power purchase rate of Rs. 5.19/kWh which higher than the approved rate at Rs. 5.13/kWh (at the same rate of bilateral short term power purchase rate) vide MTR Order for AEML-D. This is inclusive of the sale made to BEST under IDT of 0.02 MU at Rs. 0.02 crore and sale made to ASL under IDT of 0.31 MU at Rs. 0.17 crore.

5.85 Charges to CTU (GNA Charges): AEML-D has received a bill amounting to Rs. 8,60,84,926/- from Central Transmission Utility (CTU) for Regional Transmission Account as per the CERC (Sharing of Inter-State Transmission Charges and Losses), Regulations, 2020. Since the bill pertains to the power sourced during July 2024, the amount has been considered in the FAC for the month of July 2024. Commission has noted the submission.

5.86 AEML-D has received a past bill amounting to Rs. 2,28,25,506/- from Central Transmission Utility (CTU) for Regional Transmission Account as per the CERC (Sharing of Inter-State Transmission Charges and Losses), Regulations, 2020 for the

period of Jan-24 to Mar-24. Since the bill is received and paid in July-24, the amount is proposed to be considered in the month of FAC for July 2024. The Commission has noted the submission.

5.87 **Other Charges:** AEML-D has considered rebate pertaining to payments made towards power purchase from contracted generators of renewable energy, traders from short term power purchase, payment made for InSTS charges, SLDC charges etc. in the month of July 2024. Though AEML has submitted that there are no specific supporting bills showing the rebate. The rebate being claimed is considering the billed amount as per the invoices and the rebate available as per contracts/ invoice. The Commission has scrutinized the details and has approved Rs. 4.51 Crore as rebate to be considered as part of power purchase cost for the month of July 2024.

5.88 Summarised reasons for the rate variation for various sources are given in Table 15 below:

Table 15: Reasons for the rate variation for various sources for July 2024

Sr. No.	Source	Approved Rate (Rs. /kWh)	Actual Rate (Rs. /kWh)	Reason for rate variation
1	ADTPS	4.94	5.30	<ul style="list-style-type: none"> There is an increase of Rs. 0.36/kWh in APPC for the month of July 2024. Fixed cost variation is contributing to increase of Rs. 0.26/kWh and variable cost variation is contributing Rs. 0.10/kWh to increase. The fixed charges are higher due to lower generation as compared to the approved generation.
2	RE Sources	3.84	3.37	<ul style="list-style-type: none"> RE power procurement from contracted sources Very less quantum of RE power procured through exchange platform. AEML-D contracted Intrastate Wind capacity with AEL in July 2024. As GCNs for July 2024 are not issued by MSEDCL, energy bills are not yet submitted by the generators and hence cost against this purchase is considered on estimation basis. Further, few bills pertaining to the earlier months were paid in July 2024 for power procurement from STPP RE and the same cost has been considered in the FAC of July 2024. The approved rate also includes the impact of RE portion of the power procurement approved from RE + Thermal RTC source in the MTR Order for FY 2024-25.
3	AEL-MTPP	5.25	5.67	<ul style="list-style-type: none"> The rate of Rs. 5.25/kWh approved in the MTR Order was based on the actual effective rate obtained in the H1 of FY 2022-23 and the same rate was adopted for FY 2024-25.

Sr. No.	Source	Approved Rate (Rs. /kWh)	Actual Rate (Rs. /kWh)	Reason for rate variation
				<ul style="list-style-type: none"> The PPA provides for change in the base fixed charges and variable charges linked to WPI. This also impacts the rate of purchase of energy.
4	Bilateral purchase	5.13	6.17	<ul style="list-style-type: none"> Market discovered rate. Higher cost purchase of short-term power from Power Exchange (IEX, PXIL, HPX and Inter Discom Trade) through day ahead exchange linked bilateral contracts and inter discom trade. The rate of power purchase from bilateral purchase is Rs. 6.17/kWh
5	RE + Thermal RTC (Conventional portion)	4.90	-	<ul style="list-style-type: none"> No power was purchased from RE + Thermal RTC source in July 2024. Power purchase is envisaged from Oct 2024 as per the submissions in MTR proceedings.
6	Sale of surplus power	5.13	5.19	<ul style="list-style-type: none"> Market discovered rate;
	Total	4.35	6.20*	Variation due to above reasons

* Includes power banked under the banking arrangement with MPL (source- BYPL and PSPCL), APPCPL (source- PSPCL), ASL and MPL (source: PSPCL). Accordingly, net energy booked under the banking arrangement in June 2024 is (230.46) MUs. The cost related to the Banking return has not been considered separately, since the banking return is provided from the power available from the existing portfolio of AEML and its cost is therefore already included in the power purchase cost for the month of July 2024. In case of power received from the banking partner, the cost will be considered when the power is being returned. This also includes OA charges / margin amounting to Rs. 0.31 Crore pertaining to the banking transaction.

5.89 Considering the above, the Commission allows the actual average power purchase cost of Rs. 6.20/kWh for the month of July 2024 as shown in Table 15 above as compared to approved average power purchase cost of Rs. 4.35/kWh.

6. FAC on account of fuel and power purchase cost (F)

6.1 The Commission has worked out the average power purchase costs for the month of July 2024 as shown in Table 15 above. The same has been compared with the average power purchase cost approved by the Commission in MTR Order dated 31st March 2023 to arrive at the differential per unit rate at which Z_{FAC} is to be passed on to the consumers.

6.2 It is noted that AEML-D has incurred the per unit Power Purchase Cost higher than the approved per unit Power Purchase Cost hence the Z_{FAC} worked out by the Commission

on account of difference in power purchase cost for the month of July 2024 is positive as shown in the Table 16 below.

Table 16: FAC on account of Power Purchase Cost

Sr. No.	Particulars	Units	July 2024
1	Average power purchase cost approved by the Commission	Rs./ kWh	4.35
2	Actual average power purchase cost	Rs. /kWh	6.20
3	Change in average power purchase cost (= 2-1)	Rs./ kWh	1.85
4	Net Power Purchase	MU	861.73
5	Change in power purchase cost (=3 x 4/10)	Rs. Crore	159.33

7. Adjustment for over recovery/under recovery (B)

- 7.1 The adjustment for over recovery/under recovery has to be done for the (n-4) month as per provisions of MYT Regulations, 2019.
- 7.2 The Commission in its May 2024 FAC approval has allowed recovery of FAC leviable for the period January 2024 to May 2024 from September 2024 to November 2024. Details of the actual recovery will be available once the actual recovery is done. Hence, the deferred over-recovery/under-recovery at the end of June 2024 to be adjusted in July 2024 is nil.

8. Carrying Cost for over recovery/under recovery (C)

- 8.1 As there is no adjustment for over recovery/under recovery as mentioned in para 7.2 above, there is no carrying cost on account of such adjustment.
- 8.2 The carrying/holding cost is computed considering the one-year SBI MCLR + 150 basis points. There is no carrying cost worked out for July 2024 as there is no over/under-recovery considered in para 7.2 above.

9. Disallowance due to excess Distribution Loss

- 9.1 Regulation 10.8 of MYT Regulations, 2019 provides for FAC amount to be reduced in case the actual annual sliding distribution loss for the month exceeds the approved distribution loss. The relevant extract is reproduced as follows.

“10.8 The total Z_{FAC} recoverable as per the formula specified above shall be recovered from the actual sales in terms of “Rupees per kilowatt-hour”:

Provided that, in case of unmetered consumers, the Z_{FAC} shall be recoverable based on estimated sales to such consumers, computed in accordance with such methodology as may be stipulated by the Commission:

Provided further that, where the actual annual sliding distribution losses of the Distribution Licensee exceed the level approved by the Commission, the amount of Z_{FAC} corresponding to the excess distribution losses (in kWh terms) shall be deducted from the total Z_{FAC} recoverable”

- 9.2 The following Table 17 provides the comparison of approved and actual distribution loss and disallowance due to excess distribution loss, if any:

Table 17: Disallowance of FAC due to excess Distribution Loss

Sr. No.	Particulars	Units	Approved in Tariff Order	Actual for July 2024	Cumulative up to July 2024	Annual Sliding Distribution Loss up to June 2023
1	Net Energy input at Distribution Voltages	MU	866.26	864.50	3,954.82	10,619.11
2	Energy sales at Distribution voltages	MU	809.51	882.48	3,776.71	10,076.40
3	Distribution Loss (1 - 2)	MU	56.74	(17.98)	178.11	542.71
4	Distribution Loss as % (3/1)	%	6.55%	-2.08%	4.50%	5.11%
5	Excess Distribution Loss = [Annual Sliding Distribution Loss (4) - Distribution loss approved] x Net Energy Input (1)	MU	-	-	-	-
6	Disallowance of FAC due to excess Distribution Loss	Rs. Crore	-	-	-	-

- 9.3 As seen from the above Table 17, distribution loss for the month of July 2024 is (2.08)% which is lower than the approved distribution loss of 6.55% in the MTR Order dated 31 March, 2023. Further, the annual sliding distribution loss up to July 2024 is 5.11% which is also lower than the distribution losses approved in the MTR Order dated 31 March 2023. AEML-D submitted that the distribution losses are being reported considering the difference between the input and sales attributable to AEML-D's own consumers. Further, the sales being reported for LT cycle billing is as per bill posting date, whereas the input will be pertaining to the concerned month itself and thus there will be variation in losses on account of the differing period of purchase and sales.

- 9.4 As part of the analysis, monthly as well as cumulative distribution losses trend is also examined with reference to approved by the Commission and similar period of last financial year as shown in Table 18 below:

Table 18: Monthly and Cumulative Distribution Loss trend of AEML-D

Year	FY 2024-25	FY 2023-24
Approved	6.55%	6.80%
Actual - April	12.77%	9.72%

Approval of FAC Charges for the month of July 2024

Year	FY 2024-25	FY 2023-24
Actual - May	8.62%	10.80%
Actual - June	-2.37%	1.14%
Actual - July	-2.08%	-2.65%
Actual - Cumulative till May 2024	4.50%	5.09%

9.5 As seen from above Table 18, disallowance of FAC due to excess distribution loss for the month of July 2024 is nil. Though the standalone FAC for the month of July 2024 is positive, as the annual sliding distribution loss is lower than approved distribution loss by the Commission, there is no disallowance of FAC due to excessive distribution loss.

10. Summary of Allowable Z_{FAC}

10.1 The summary of the FAC amount as approved by the Commission for the month of May 2024 as shown in the Table 19 below.

Table 19: Summary of Allowable Z_{FAC} for July

Sr. No.	Particulars	Units	As Claimed June 2024	As Approved June 2024
1	Calculation of Z_{FAC}			
1.1	Change in cost of generation and power purchase attributable to Sales within the License Area (F)	Rs. Crore	159.33	159.33
1.2	Carrying cost for over-recovery/under-recovery (C)	Rs. Crore	-	-
1.3	Adjustment factor for over-recovery/under-recovery (B)	Rs. Crore	-	-
1.4	Z_{FAC} = F+C+B	Rs. Crore	159.33	159.33
2	Calculation of FAC Charge			
2.1	Energy Sales within the License Area	MU	882.48	882.48
2.2	Excess Distribution Loss	MU		-
2.3	Z _{FAC} per kWh	Rs./kWh	1.81	1.81
3	Recovery of FAC			
3.1	FAC disallowed corresponding to excess Distribution Loss [(2.2 x 2.3)/10]	Rs. Crore	-	-
3.2	Allowable FAC	Rs. Crore	159.33	159.33
4	Utilization of FAC Fund			
4.1	Opening Balance of FAC Fund	Rs. Crore	51.37	47.57
4.2	Carrying cost	Rs. Crore	0.44	-
4.3	Z _{FAC} for the month (Sr. No. 3.2)	Rs. Crore	159.33	159.33
4.6	Closing Balance of FAC Fund	Rs. Crore	211.13	206.90
4.7	Z _{FAC} leviable/refundable to consumer	Rs. Crore	211.13	206.90
5	Total FAC based on category wise and slab wise allowed to be recovered in future billing months	Rs. Crore	152.04[#]	206.90
6	Carried forward FAC for recovery during future period (4.7-5)	Rs. Crore	59.09	-

[#] The estimated recovery in November and December 2024 as per AEML-D is expected at Rs. 200 Crores. Accordingly, the net recovery allowed after excluding the recovery of Rs. 47.96 Crore already

approved for November 2024 is Rs. 152.04 Crore. The estimated carry forward recovery for future period is Rs. 59.09 Crore.

10.2 It can be seen from the above Table 19 that opening FAC recoverable for month of July 2024 is Rs. 47.57 Crore and standalone FAC for the month of July 2024 approved by the Commission is Rs. 159.33 Crore. Accordingly, the FAC amount recoverable from the consumer for the month of July 2024 is Rs. 206.90 Crore. However, due to the reasons discussed earlier, the Commission has decided to carry forward and accumulate the FAC for a two-month period i.e., June 2024 to July 2024, along with the applicable carrying cost (excluding the period of delay). The accumulated FAC amount shall be recovered in the months starting November 2024 till January 2024.

11. **Recovery from Consumers:**

11.1 Regulation 10.9 of MERC MYT Regulations, 2019 provides for methodology of recovery of FAC charge from each category of consumers. The relevant extract is reproduced as below.

“10.9 The ZFAC per kWh for a particular Tariff category/sub-category/consumption slab shall be computed as per the following formula: —

$$Z_{FAC\ Cat} (Rs/kWh) = [Z_{FAC} / (Metered\ sales + Unmetered\ consumption\ estimates + Excess\ distribution\ losses)] * k * 10,$$

Where:

Z_{FAC Cat} = Z_{FAC} component for a particular Tariff category/sub-category/consumption slab in 'Rupees per kWh' terms.

k = Average Billing Rate / ACOS;

Average Billing Rate = Average Billing Rate for a particular Tariff category/sub-category/consumption slab under consideration in 'Rupees per kWh' as approved by the Commission in the Tariff Order:

Provided that the Average Billing Rate for the unmetered consumers shall be based on the estimated sales to such consumers, computed in accordance with such methodology as may be stipulated by the Commission:

ACOS = Average Cost of Supply in 'Rupees per kWh' as approved for recovery by the Commission in the Tariff Order:

Provided that the monthly Z_{FAC} shall not exceed 20% of the variable component of Tariff or such other ceiling as may be stipulated by the Commission from time to time:

Provided further that any under-recovery in the Z_{FAC} on account of such ceiling shall be carried forward and shall be recovered by the Distribution Licensee over such future period as may be directed by the Commission....”

- 11.2 The Commission allows the standalone FAC amount of Rs. 159.33 Crore for the month of July 2024.
- 11.3 In its FAC submission for July 2024, AEML-D has requested the Commission to allow cumulative recovery of FAC for the period June 2024 to July 2024 from November 2024 onwards at FAC ceiling rate (20% of category energy charge) to ensure that accumulated revenue gap can be mopped up to the maximum possible and avoiding the impact of carrying cost on the accumulated amount. In this regard, AEML-D has also submitted that the Commission vide letter dated 30 August 2024, has approved the FAC for the period up to May 2024 and has also approved the category wise FAC for recovery for the months from September 2024 to October 2024 at the ceiling rate (20% of category energy charges) and considered the balance FAC amount of Rs. 47.96 crore to be recovered in the month of November 2024. AEML-D has suggested that the amount allowed to be recovered in November 2024 (Rs. 47.96 Crore) should be clubbed with the FAC accumulated for the period June 2024 to July 2024 and allowed for recovery in the months of November 2024 and December 2024. As the billing for the month of November 2024 has not commenced, AEML-D has requested the Commission to revise the FAC allowed for recovery in November 2024 to 20% of category energy charge and allow recovery of the total accumulated FAC for the period June 2024 to July 2024 including the recovery allowed earlier in November 2024 (Rs. 47.96 Crore) over the period of November 2024 and December 2024. The portion of the accumulated FAC not recovered over the period November 2024 and December 2024 is proposed to be recovered in the future.
- 11.4 Similar situation was prevailing earlier as well, and this situation could have been envisaged well in advance by AEML-D and they could have ensured time submission of FAC proposals and response to data gaps raised by the Commission presently and in the past as well.
- 11.5 As highlighted by the Commission in the past FAC approval reports, variation in FAC amounts over different months lead to variation in Tariff for end consumers on a monthly basis thereby defeating the objective of creating FAC stabilization fund. In similar situations in the past, the Commission has taken an approach to accumulate the FAC leviable and allowing the recovery of such accumulated amounts in ensuing months. Similar approach was also adopted by the Commission for the period January 2024 to May 2024 wherein the recovery was allowed over the period September 2024 to October 2024 at the ceiling rate (20% of category energy charge). Accordingly, considering the accumulated FAC over the period June 2024 to July 2024, the Commission deems it appropriate to adopt a similar approach of accumulating the FAC for June 2024 to July 2024 and allowing recovery at the ceiling limit of the FAC charge (20% of category energy charge) which would ensure that the accumulated FAC gets passed through via the FAC mechanism to the maximum extent possible in the remaining period and thus avoiding the impact of carrying cost on the accumulated FAC and the revenue gap to be carried forward to the new Multi Year Tariff control

period will be minimal, thus minimising the carrying cost impact on the consumers to that extent. Accordingly, the Commission considers it appropriate to accumulate the FAC for the period of June 2024 to July 2024 and allow its recovery in the ensuing months at ceiling tariff. The recovery will start from November 2024.

- 11.6 Further, in its approval of FAC for May 2024, the Commission had accorded the recovery of the accumulated FAC between January 2024 and May 2024 in the months of to September 2024 to November 2024. Based on the category-wise FAC rate approved by the Commission, the monthly recovery amount was estimated to be Rs. 116.40 Crore for September 2024 and October 2024. The balance recovery allowed in November 2024 was Rs. 47.96 Crore. AEML-D, while submitting its FAC submission of July 2024 requested a consideration of the recovery timeline for the FAC accrued for the period June 2024 to July 2024 from November 2024 onwards. In this regard, as stated earlier, AEML-D has suggested that FAC amount of Rs. 47.96 crore to be recovered in the month of November 2024 should be clubbed with the FAC accumulated for the period June 2024 to July 2024 and allowed for recovery in the months of November 2024 and December 2024 considering the recovery at the ceiling rate (20% of category energy charge). As the billing for the month of November 2024 has not commenced, AEML-D has requested the Commission to revise the FAC allowed for recovery in November 2024 to 20% of category energy charge and allow recovery of the total accumulated FAC for the period June 2024 to July 2024 including the recovery allowed earlier in November 2024 (Rs. 47.96 Crore) over the period of November 2024 and December 2024. The portion of the accumulated FAC not recovered over the period November 2024 and December 2024 is proposed to be recovered in the future.
- 11.7 The Commission has considered the submission of AEML-D and has assessed that an estimated amount of Rs. 100.01 Crores can be recovered per month considering the sales for July 2024 at the ceiling FAC rate (20% of category energy charge). The Commission in its FAC approval for May 2024 has allowed an estimated recovery of Rs. 47.96 Crore in the month of November 2024. Thus, considering the recovery at ceiling FAC rate, an additional estimated recovery of Rs. 52.05 Crores for the month of November 2024 is assessed. Accordingly, the Commission approves an additional recovery of Rs. 52.05 Crores in addition to the previously approved Rs. 47.96 Crore for November 2024, making the total estimated FAC amount recoverable in November 2024 of Rs. 100.01 Crores at the ceiling rate. Accordingly, recovery allowed in the month of November 2024 has been revised and the ceiling rate for FAC will apply in the month of November 2024 as well.
- 11.8 Accordingly, the Commission allows AEML-D to recover the accumulated FAC amount of Rs. 206.90 Crore for the period June 2024 to July 2024 over the months of November 2024 to January 2024 along with the applicable carrying cost. The FAC will be recoverable at the ceiling FAC rate for the months of November 2024 and December 2024 and the balance amount will be recovered in the month of January 2025 at the

FAC rate approved by the Commission in this report and no carry forward FAC amount is envisaged for recovery in the future period. This is in line with the approach adopted by the Commission in its FAC approval for May 2024. The issue related to disallowance of carrying cost for the period of delay in FAC submissions by AEML-D has been discussed in detail by the Commission in its Order on FAC for the month of April 2023. Same reasons are also valid in the present situation as well.

- 11.9 The working of the recovery of the FAC accumulated for the period June 2024 to July 2024 during the months of November 2024 to December 2024 is presented below:

Table 20: Working of recovery for the billing month of November 2024

Total Recovery due at the end of July 2024	Rs. Crore	206.90
Estimated Recovery with 20% Cap considering sales for July 2024	Rs. Crore	100.01
Estimated Recovery period	Months	2.07
Estimated recovery allowed earlier in November 2024 in the FAC report for May 2023	Rs. Crore	47.96
Additional recovery possible in November 2024 considering the ceiling rate	Rs. Crore	52.05
Total estimated recovery in November 2024	Rs. Crore	100.01
Closing balance as on July 2024	Rs. Crore	206.90
Less: Revised recovery allowed in November 2024	Rs. Crore	100.01
Balance FAC to be recovered in the period December 2024 to January 2025	Rs. Crore	154.85

Table 21: Recovery plan for the billing months of December 2024 to January 2025

Sr. No.	Recovery Months	December 2024	January 2025
(a)	Opening Balance (Rs. Crore)	154.85	55.98 (54.85 + Carrying Cost of 0.90 + 0.24)
(b)	Estimated recovery during month (Rs. Crore)	100.01	55.98*
(c)	Closing Balance (Rs. Crore)	54.84	-
(d)	Rate of Interest (%)	10.30%	10.30%
(e)	Carrying cost (Rs. Crore)	0.90	0.24

*Includes carrying cost (e)

- 11.10 Since the accumulated FAC fund along with the eligible carrying cost is allowed for recovery during the billing months of November 2024 to January 2025, the FAC amount to be carried forward at the end of January 2025 for recovery in the future billing months works out to nil.

- 11.11 In view of the above, part of the accumulated FAC for the period June 2024 to July 2024 is to be recovered at the ceiling rate (20% of variable charges) in the billing

months of November 2024 and December 2024 and the remaining quantum is to be recovered in January 2025 at the rate approved by the Commission in the present report. Accordingly, the per unit Z_{FAC} for the months of June 2024 to July to be levied on consumer of AEML-D in the billing months of November 2024 to December 2024 is given below.

Table 22: Per unit Z_{FAC} for the months of June 2024 to July 2024 be levied on the consumers of AEML-D in the billing months of November 2024 to December 2024

* The conversion from Rs./kWh to Rs./kVAh has been done using the PF considered by the Commission in its MTR Order in Case No. 231 of 2022.

11.13 For a few categories like EHT II, EHT III, EHT V(A), EHT V(B), EHT VI and HT IV the Commission has not computed the ABR in the MTR Order in Case No. 231 of 2022 issued on 31 March 2023 as no sales were estimated by the licensee during the present control period. In absence of the ABR, the computation of the applicable FAC rate is not possible considering the formula approved in the MERC MYT Regulations 2019. However, AEML-D in its submission for May 2024 had requested the Commission to approve the category wise FAC for all the consumer categories, even though AEML-D presently has no energy sales for certain categories. This is because there could be energy sales in future against these categories and for which the FAC to be levied should therefore be known to AEML-D. In view of the above request and considering the constraints pertaining to the availability of ABR data and the fact that the energy charges approved by the Commission for similar EHT and HT Categories is same (e.g. Energy Charge for both EHT II and HT II is Rs. 6.70/kWh), the Commission is presently considering the FAC rate for these categories (EHT) same as the FAC applicable for the equivalent HT categories and vice versa. E.g. for EHT II category, the applicable FAC rate will be same as that applicable for the HT II category. Likewise, the FAC rate for HT IV category will be same as that applicable for EHT IV category.
