

**Summary of Observations/Analysis on Quarterly Reports submitted by TPC-D and RInfra-D:-**

➤ **Switchover consumers- Status during the period (23 Aug 2012 to 31 May 2013)**

There is a difference between the number of switchover applications as submitted by RInfra-D and TPC-D, which has been explained by RInfra-D as being on account of TPC-D treating switchover applications as new direct applications, even though such consumers were 'consumers' of RInfra. This issue may be on account of Temporary Connections being given by RInfra and permanent connections being taken from TPC-D. This aspect needs to be investigated further, as TPC-D is not allowed to switchover consumers from categories other than 0-300 residential category, in accordance with the Commission's directions in Case No 151 of 2011,.

➤ **Status of HT and LT Network addition during the Period (23 Aug 2012 to 31 May 2013)**

There has been negligible network addition in Trombay, Vrindavan, Mankhurd-Chembur, Arogya Nidhi, Malad BMC Lagoon, and Vasantotsav Clusters. Even in other Clusters, the % completion is quite low. TPC-D's readiness to meet its Universal Service Obligation (USO) needs to be investigated further in view of the network data submitted by TPC-D in 11 clusters
